Qualifications in the audit report

Ernst & Young S.p.A. audit reports on the Issuer's consolidated financial statement for the financial year ending 30 June 2022 and 30 June 2023 were issued without qualification or reservation.

WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE ISSUER?

- The operations, earnings capacity and the stability of the sector of both the Issuer and the Mediobanca Group may be influenced by its/their credit standing, the general economic situation of Italy and the entire Eurozone, trends on financial markets and the economic, social and financial consequences generated by the Russia/Ukraine conflict. With reference to financial markets, the solidity, resilience and growth prospects of the economies of the countries in which the Issuer operate in particular will be especially important. The macroeconomic scenario is currently marked by considerable uncertainty in relation to: (a) the Russian-Ukrainian conflict and recent developments in the Israeli-Palestinian conflict; (b) the long-term consequences of the health crisis due to the Covid-19 pandemic; (c) the possible joint actions by the main rating agencies; and (d) the recent crisis in the international banking system, combined with restrictions imposed by jurisdictions to reduce persistent inflationary pressures, which have led to a slowdown in global growth. In relation to point (a) above, the persistence of uncertainties linked to the Russian-Ukrainian conflict continue to generate strong tensions on the energy and commodities markets. With reference to the Israeli-Palestinian conflict, the continuation and/or worsening of the crisis between the Palestinian and Israeli governments could lead to the emergence of a further profile of uncertainty with possible macroeconomic and market consequences. In relation to point (b) above, the adoption of a zero-tolerance policy like the one adopted by the Chinese government in the past, which imposes a total absence of tolerance towards Covid infections, could have a further impact on the Italian economic, social and financial situation and therefore, as a consequence, on the credit quality, capitalization and profitability of Mediobanca, which operates mainly on the Italian market. It should be noted that as of 30 June 2023, adjustments to loans were equal to €270.1 million (compared to €242.6 million as of 30 June 2022) and that the Group's cost of risk was equal to 52bps (compared to 48bps as of 30 June 2022). In relation to point (c) above, any joint actions by the main rating agencies which result in an assessment of the creditworthiness of the Republic of Italy below the level of investment grade, may have a negative impact on the income statement, balance sheet and financial position of Mediobanca and/or the Group. In relation to point (d) above, to deal with the increase in prices due to inflationary pressures, the Central Banks (in particular the Federal Reserve and the ECB) have resorted to restrictive monetary policies; despite this, inflation in both the United States and the European Union remained well above monetary policy objectives. In this context, the peak of volatility was recorded in March 2023, when news on the state of the accounts of Silicon Valley Bank (SVB) and its subsequent default raised fears about the stability of the banking sector, both in the USA and in Europe. In the following weeks, these fears transferred to Credit Suisse, considered the most fragile global financial institution, which were then resolved with the intervention of public institutions which forced its acquisition by UBS. As of the date of the Base Prospectus, the Group has no significant investments in any of the banks mentioned above. Hence, as of the date of the Base Prospectus, the ongoing downward trend in the growth estimates for macroeconomic indicators, such as inflation, employment and private consumption indicators, coupled with the increase in volatility on financial markets, risks creating adverse repercussions on the earnings, capital and financial situation of the Issuer and/or on the Group.
- The business activities of both Mediobanca and the Group and their earnings and financial solidity depend also on the credit standing of their respective clients and counterparties. Mediobanca is exposed to the risks traditionally associated with credit activity. Accordingly, breach by its customers of contracts entered into and their own obligations, or the possible failure to provide information or the provisions of incorrect information by them regarding their respective financial and credit situation, could impact negatively on the earnings, capital and/or financial situation of Mediobanca.
- On 24 May 2023, Mediobanca's Board of Directors approved its 2023-26 Strategic Plan One Brand – One Culture (the "Strategic Plan"), which contains certain targets to be reached (the "Plan Objectives") relating to Environmental, Social and Governance issues. As of the date of the Base Prospectus, the Issuer's capability to implement the actions and to meet the Plan Objectives depends on a number of circumstances, some of which are beyond the Issuer's control, including, but not limited to, the macroeconomic scenario, which could be compromised by the consequences deriving from the Russia/Ukraine conflict, the changes in the regulatory framework, and the effects of specific actions or concerning future events which the Issuer is only partially able to influence. Furthermore, there is no certainty that the actions provided for in the Strategic Plan will result in the benefits expected from implementation of the Plan Objectives; if such benefits fail to materialize, the results expected by Mediobanca may differ, even materially, from those envisaged in the Strategic Plan. The Issuer is subject to market risk, defined as the risk of the loss of value of the financial instruments, including sovereign debt securities, held by the Issuer as a result of movements in market variables (including, but not limited to, interest rates, stock market prices and/or exchange rates) or other factors that could trigger a deterioration in the capital solidity of the Issuer and/or the Group. The financial year ended at 30 June 2023 has been characterised by a persistent volatility across all asset classes, especially interest rates, due primarily to the macroeconomic context, which has been characterised by a high inflation rate for the principal Western economies.
- The Issuer is subject to market risk, defined as the risk of the loss of value of the financial instruments, including sovereign debt securities, held by the Issuer as a result of movements in market variables (including, but not limited, interest rates, stock market prices and/or exchange rates) or other factors that could trigger a deterioration in the capital solidity of the Issuer and/or the Group. The financial year ended at 30 June 2023 has been characterized by a persistent volatility across all asset classes, especially interest rates, due primarily to the macroeconomic context, which has been characterised by a high inflation rate for the principal Western economies.
- The Issuer is exposed to different types of operational risk. The event types most impacted by operational risk are originated by products sold to clients, commercial practices, the execution of operating processes, and frauds committed from outside the Group. Although the Mediobanca Group has adopted a system for recording, assessing and monitoring operational risks with a view to preventing and containing them, it should be noted that unpredictable events or events otherwise beyond the control of the Issuer could occur, which could impact negatively on the Issuer's and the Group's operating results, activities and earnings, capital and/or financial situation, as well as on their reputation.

<p>WHERE WILL THE SECURITIES BE TRADED?</p>
<p>Listing and Trading of Notes</p> <p>Application has been made by the Issuer (or on its behalf) for the Notes to be admitted to trading on Borsa Italiana S.p.A. (Mercato Telematico delle Obbligazioni) which is a regulated market for the purpose of Directive 2014/65/EU with effect within three months following the Issue Date.</p>
<p>WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE NOTES?</p>
<p>General</p> <ul style="list-style-type: none">• A potential investor should not invest in Notes which are complex financial instruments unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor’s overall investment portfolio. <p>Risk related to the structure of a particular Issue of Notes</p> <ul style="list-style-type: none">• In the event that the Issuer would be obliged to increase the amounts payable in respect of any Notes due to any withholding or deduction, the Issuer may redeem all outstanding Notes in accordance with the Terms and Conditions of the Italian Law Notes.• The Notes may be redeemed at the option of the Issuer, in whole, but not in part, upon the occurrence of a MREL Disqualification Event. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. <p>Risks related to Notes generally</p> <ul style="list-style-type: none">• The Issuer may, without the consent of Noteholders, correct (i) any manifest error in the Terms and Conditions of the Italian Law Notes in Dematerialised Form and/or in the Final Terms; (ii) any error of a formal, minor or technical nature in the Terms and Conditions of the Italian Law Notes in Dematerialised Form and/or in the Final Terms or (iii) any inconsistency in the Terms and Conditions of the Italian Law Notes in Dematerialised Form and/or in the Final Terms between the Terms and Conditions of the Italian Law Notes in Dematerialised Form and/or the Final Terms and any other documents prepared in connection with the issue and/or offer of a Series of Notes (provided such correction is not materially prejudicial to the holders of the relevant Series of Notes). In all cases described above, the Noteholders may be bound by any amendments, including those prejudicial to their interests, even if they had not provided their consent. <p>Risks related to the market</p> <ul style="list-style-type: none">• Notes may have no established trading market when issued, and one may never develop. The Issuer has not any obligation to purchase the Notes from the Noteholders. However, should the Issuer decide to purchase the Notes, the secondary market pricing that the Issuer may provide on the Notes may reflect the unwinding cost of the hedging portfolio (if any).• Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes.• One or more independent credit rating agencies have assigned credit ratings to the Notes. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Notes.• It is not possible to predict the price at which Notes will trade in the secondary market or whether such market will be liquid or illiquid. The Issuer may, but is not obliged to, list or admit Notes to trading on a stock exchange or market. The Issuer, or any of its Affiliates may, but is not obliged to, at any time purchase Notes at any price in the open market or by tender or private agreement.• The Issuer shall use all reasonable endeavours to maintain listing on the Mercato Telematico delle Obbligazioni di Borsa Italiana S.p.A., provided that if it becomes impracticable or unduly burdensome or unduly onerous to maintain such listing, then the Issuer may apply to de-list the relevant Notes, although in this case it will use all reasonable endeavours to obtain and maintain (as soon as reasonably practicable after the relevant de-listing) an alternative equivalent admission to listing, trading and/or quotation by a stock exchange, market or quotation system within or outside the European Union, as it may decide. If such an alternative admission is not available or is, in the opinion of the relevant Issuer, impracticable or unduly burdensome, an alternative admission will not be obtained and the liquidity of the secondary market of the Notes could be affected.
