Qualifications in the audit report:

Ernst & Young S.p.A. audit report on the Issuer's consolidated financial statement for the financial year ending 30 June 2022 and 30 June 2023 and the interim financial period ending on 31 December 2022 and 31 December 2023 was issued without qualification or reservation.

What are the key risks that are specific to the Issuer?

The Issuer and Mediobanca Group is subject to the following key risks:

- the operations, earnings capacity and the stability of the sector of both the Issuer and the Mediobanca Group may be influenced by its credit standing, the general economic situation of Italy and the entire Eurozone, trends on financial markets and the economic, social and financial consequences generated by the Russia/Ukraine conflict. With reference to financial markets, the solidity, resilience and growth prospects of the economies of the countries in which the Issuer operates in particular will be especially important. The macroeconomic scenario is currently marked by considerable uncertainty in relation to: (a) the Russia/Ukraine conflict and recent developments in the Israeli-Palestinian conflict; (b) the long-term consequences of the health crisis due to the Covid-19 pandemic; (c) the possible joint actions by the main rating agencies; and (d) the recent crisis in the international banking system, combined with restrictions imposed by jurisdictions to reduce persistent inflationary pressures, which have led to a slowdown in global growth. In relation to point (a) above, the persistence of uncertainties linked to the Russian-Ukrainian conflict continue to generate strong tensions on the energy and commodities markets. With reference to the Israeli-Palestinian conflict, the continuation and/or worsening of the crisis between the Palestinian and Israeli governments could lead to the emergence of a further profile of uncertainty with possible macroeconomic and market consequences. In relation to point (b) above, in the 2022/2023 financial year, global economic growth was influenced by the Chinese government's decision to abandon the zero-tolerance policy towards Covid infections. China's decision in the latter part of the first half of the year reversed the global economy's loss of momentum and helped in restoring its momentum. In relation to point (c) above, any joint actions by the main rating agencies which result in an assessment of the creditworthiness of the Republic of Italy below the level of investment grade, may have a negative impact on the income statement, balance sheet and financial position of Mediobanca and/or the Group. In relation to point (d) above, in the last part of the financial year ended on 30 June 2023, the combination of turbulence in the US and Swiss banking sectors and the emergence of the economic effects of monetary restrictions, led to a slowdown in the growth of economic activity and a de-synchronization of economic cycles between the economic areas of North America, the European continent and the Far East. Hence, as of the date of this Base Prospectus, the ongoing downward trend in the growth estimates for macroeconomic indicators, such as inflation, employment and private consumption indicators, coupled with the increase in volatility on financial markets, risks creating adverse repercussions on the earnings, capital and financial situation of the Issuer and/or on the Group.
- the business activities of both Mediobanca and the Group and their earnings and financial solidity depend also on the credit standing of their respective clients and counterparties. Mediobanca is exposed to the risks traditionally associated with credit activity. Accordingly, breach by its customers of contracts entered into and their own obligations, or the possible failure to provide information or the provisions of incorrect information by them regarding their respective financial and credit situation, could impact negatively on the earnings, capital and/or financial situation of Mediobanca.
- as at the date of the Base Prospectus, the Issuers' capability to implement the actions and to meet the targets to be reached (the "Plan Objectives") contained in its 2023-26 Strategic Plan depends on a number of circumstances, some of which are beyond the Issuer's control, including, but not limited to, the macroeconomic scenario, which could be compromised by the consequences deriving from the Russia/Ukraine conflict, the changes in the regulatory framework, and the effects of specific actions or concerning future events which the Issuer are only partially able to influence. However, there is no certainty that the actions provided for in the Issuer's 2023-

26 Strategic Plan will result in the benefits expected from implementation of the Plan Objectives; if such benefits fail to materialize, the results expected by Mediobanca may differ, even materially, from those envisaged in the 2023-26 Strategic Plan.

- the Issuer is subject to market risk, defined as the risk of the loss of value of the financial instruments, including sovereign debt securities, held by the Issuer as a result of movements in market variables (including, but not limited, interest rates, stock market prices and/or exchange rates) or other factors that could trigger a deterioration in the capital solidity of the Issuer and/or the Group. The financial year ended at 30 June 2023 has been characterized by a persistent volatility across all asset classes, especially interest rates, due primarily to the macroeconomic context, which has been characterised by a high inflation rate for the principal Western economies.
- the Group is exposed to different types of operational risk. The event types most impacted by operational risk are originated by products sold to clients, commercial practices, the execution of operating processes, and frauds committed from outside the Group. Although the Mediobanca Group has adopted a system for recording, assessing and monitoring operational risks with a view to preventing and containing them, it should be noted that unpredictable events or events otherwise beyond the control of the Issuer could occur, which could impact negatively on the Issuer's and the Group's operating results, activities and earnings, capital and/or financial situation, as well as on their reputation.

What are the key risks that are specific to the Notes?

The Notes are subject to the following key risks:

General

- The Notes may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. An investment in the Notes, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional Notes such as debt or equity Notes. Set out below is a description of the most common risks.

Risks related to the structure of a particular issue of Notes

- The Notes involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Notes. Certain general risk factors related to the Notes referencing an Underlying Reference, including that the market price of the Notes may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Notes; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other Notes or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Notes are of limited maturity and, unlike direct investments in a share, investors are not able to hold Notes beyond the Settlement Date in the expectation of a recovery in the price of the underlying.
- The Issuer may, but is not obliged to, list or ask for admission to trading of Notes on a stock exchange or a trading venue. If the Notes are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Notes will not be delisted or that trading on such stock exchange or trading venue will not be suspended. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Notes. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices. Even if the relevant Issuer or such other entity is a market-maker for an issue of Notes, the secondary market for such Notes may be limited.
- In case certain events, indicated in the terms and conditions and the relevant final terms, occurs with reference to the relevant Underlying Reference(s) or the Notes, the Calculation Agent and the Issuer have broad discretion to make certain determinations to account for such event(s) including to (i) make adjustments to the terms of the Notes and/or (ii) cause early settlement of the Notes, any of which determinations may have an adverse effect on the value of the Notes. The effects of coronavirus pandemic (such as the measures taken by governments and authorities in this respect) may cause the occurrence of the events indicated above and involve such adjustments to the terms of the Notes and/or early settlement of the Notes.
- The Terms and Conditions of the Notes are based on Italian law in effect as at the date of the Base Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to Italian law or administrative practice after the date of the Base Prospectus.

Risks relating to Underlying Reference

- The Notes may be linked to a "benchmark" as defined under the Benchmark Regulation. The Benchmarks Regulation, inter alia: (i) requires benchmark administrators to be authorised or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognised or endorsed) and (ii) prevents certain uses by EU supervised entities (such as the Issuer) of "benchmarks" of administrators that are not authorised or registered (or, if non-EU based, not deemed equivalent or recognised or endorsed). The

scope of the Benchmarks Regulation is wide and, in addition to applying to so-called "critical benchmark" indices, could also potentially apply to many other interest rate indices, as well as equity, commodity and foreign exchange rate indices and other indices (including "proprietary" indices or strategies) which are referenced in listed financial instruments (including listed Notes), financial contracts and investment funds. In this respect, any changes to a "benchmark" due to the Benchmark Regulation could, inter alia: (i) discourage market participants from continuing to administer or contribute to such "benchmark"; (ii) trigger changes in the rules or methodologies used in the "benchmark"; or (iii) lead to the disappearance of the "benchmark". In such events, depending on the particular "benchmarks" and the applicable terms of the Notes, the Notes could be delisted (if listed), adjusted, redeemed or otherwise impacted and their volatility may be affected.

- The occurrence of an Administrator/Benchmark Event may lead to early settlement or adjustment of the Notes, which may include selecting one or more successor benchmarks and making related adjustments to the Notes, including, if applicable to reflect increased costs. An Administrator/Benchmark Event may arise if any of the following circumstances occurs or will occur: (1) a benchmark is materially changed or permanently cancelled, or (2) (i) the relevant authorisation, registration, recognition, endorsement, equivalence decision or approval in respect of the benchmark or the administrator or sponsor of the benchmark is not obtained, (ii) an application for authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register is rejected or (iii) any authorisation, registration, recognition, endorsement, equivalence decision or approval is suspended or inclusion in any official register is withdrawn.
- Interest payable on Linked Interest Notes may be determined by reference to an Underlying Reference or combinations of a number of different Underlying References.
